Software engineer with several years of production experience across the stack – currently building Python backend services at Seznam.cz, with a strong front-end background in Angular and Svelte (TypeScript/JavaScript). Helped to take a customer-facing IAM product from prototype to production, designing and implementing both UI and large parts of its infrastructure. Bachelor's degree in IT (FIT VUT Brno) with a research background in formal methods and explainable AI.

EXPERIENCE

Backend Developer

Seznam.cz

Apr 2026 – Present
Brno, Czech Republic

- Develop Python backend services for the elections platform, handling and processing data from the Czech Statistical Office (ČSÚ).
- Built an internal tool that diffs two versions of an API, surfacing schema changes so front-end developers can quickly see what has changed between versions.
- Stack: Python.

Front-end Developer

Atos

Mar 2023 – Apr 2026
Brno, Czech Republic

- Modernized an Identity & Access Management (IAM) web product delivered to customers, migrating a legacy tool into a fully web-based application.
- Designed and implemented not only the UI but large parts of the application's infrastructure, carrying it from prototype to a production system.
- Came up with and implemented new ideas to improve the product's functionality and user experience.
- Stack: Angular, TypeScript, JavaScript, CSS.

Front-end Developer

IDS (Intentionally Designed Solutions)

Apr 2022 – Jan 2023
Remote

- Developed responsive web applications for desktop, tablet, and mobile, built on Svelte.
- Designed and built reusable UI components shared across multiple projects and team members, improving consistency and reducing duplicated work.
- Stack: Svelte, TypeScript, JavaScript, MongoDB.

PROJECTS & RESEARCH

Synthesis of Explainable Controllers for POMDPs | *Python, PAYNT, Storm/stormpy* Bachelor's Thesis, 2026

- Synthesized compact, human-readable finite-state controllers for Partially Observable Markov Decision Processes (POMDPs) – agents that act optimally under uncertainty while staying small enough to interpret.
- Extended the PAYNT synthesis tool (built on the Storm model checker) in Python; source on GitHub | full thesis.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C, Python, Java, HTML5, CSS, SQL

Frameworks & Tools: Angular, Svelte, FastAPI, SQLAlchemy, Tailwind CSS

Databases & Infrastructure: MySQL, MongoDB, Docker, Kubernetes, GitLab CI/CD, Git

EDUCATION

Brno University of Technology (FIT VUT)

Bachelor of Science in Information Technology

2022 – 2026
Brno, Czech Republic

Grammar School Brno, Vídeňská

Six-year program with specialization in programming

2016 – 2022
Brno, Czech Republic

LANGUAGES

English – Upper intermediate (B2) | German – Elementary (A2)
